Permit loading of goods traffic

*317. SHRI SANGH PRIYA GAUTAM
SHRI JAGDISH PRASAD MATHUR:

Will the Minister of RAILWAYS be pleased to state:

(a) whether the Western and Northern Railways had the practice to permit loading of goods traffic strictly as per the marked earring capacity at a station and yet charge the consignee the freight for over-marked capacity by one tonne for four-wheeler wagon and two tonnes for the eight-wheeler capacity;

(b) if so, the reasons thereof and whether the practice has been abandoned, if so since when; and

(c) whether the over charges thus surreptitiously collected by the railways were returned to the concerned parties, if not, the reasons therefor ?

THE MINISTER OF RAILWAYS (SHRI C. K. JAFFER SHARIEF): (a) to (c) Prior to 1- 5-1991, Metre Gauge wagons were permitted to be loaded and charged upto the marked Carrying Capacity plus one tonne in case of four-wheeled wagons and marked Carrying Capacity plus two tonnes in case of eight-wheeled wagons, subject to axle load restrictions. With effect from 1-5-1991, the Rules were amended so as to remove the condition of axle load restriction for the purpose of loading and charging. Over the Western and Northern Railways there were instances after 1-5-1991 where the booking stations restricted loadings only to the extent the axle loads permitted but freight was charged at the destinations as per the revised rule. This was due to differences in the interpretation of the revised rule. By December 1991, the loading and charging as per the revised rules was fully implemented on these two Railways. Decision on requests for refund will depend on the merits and circumstances of each case.
